COBALTO™ CO5300

ODATALOGIC

MEET YOUR NEW BEST FRIEND

During daily scanning activities, an operator's best experience is to work with a fast, easy-to-use, friendly, and pleasant looking device; a reliable and cheerful companion.

Combining all these features together, the new Cobalto™ omnidirectional presentation laser scanner guarantees an excellent value for customers looking for outstanding performance in a stylish and full-featured product.

An elegant blue 'Ring of Light' encircles the reading window, which turns a bright green to visually confirm a good read. Additionally, a high quality polyphonic speaker can be configured to provide the preferred sound or 'jingle' for audio confirmations of a good read.

OUTSTANDING PERFORMANCE

The omnidirectional reading pattern of 20 lines and 1,500 scans per second provides the market's fastest 1D decoding rate and motion tolerance, key features in applications that require immediate and intuitive reading.

A single line activated by an ergonomic top 'SCAN' capacitive trigger, combined with rubber finishing grips and a 30° adjustable scan head allows it to be comfortably used as a handheld reader for scanning large or bulky items.

The readers can also be configured to be in 'stand-by' mode to minimize power consumption when the scanner is not in use. The scanner will automatically 'wake-up' when it detects a code.

SERVICE WITH A SMILE

The Cobalto presentation scanners are the ideal solution for checkout counters in convenience stores, specialty or apparel stores, as well as for office automation applications such as manual scanning of documents, envelopes, and small packages for postal and courier applications.

POINTS CLÉS

- Ring of Light visual good-read confirmation
- Configurable polyphonic speaker for customized audio good-read confirmation
- Top of the range speed and motion tolerance on 1D bar codes
- Adjustable scan head with 30° tilting ability for larger items
- Ergonomic rubber finishing grips are ideal for handheld operations
- Capacitive trigger for single line targeting applications such as Price Look Up (PLU) lists
- Checkpoint® Systems EAS compatible
- Les programmes de service EASEOFCARE offrent un large choix d'options de couverture afin de protéger vos investissements, garantissant une productivité et un retour sur investissement (ROI) optimaux

APPLICATIONS INDUSTRIELLES

- Commerce de détail point de vente
- Services commerciaux : poste, banques, administrations publiques, services publiques
